Bringing Nature Home and *Nature's Best Hope* by Douglas W. Tallamy

To identify plants, insects and more, download the SEEK app through iNaturalist.org: [Seek by iNaturalist · iNaturalist](#) You can also report your sightings through this app.

To determine if a plant is native to CT, New England or the U.S., check out Native Plant Trust's GoBotany web page: [Go Botany: Native Plant Trust](#). Common names differ, so you may have to enter the scientific name (SEEK will display the name when the photo is taken)

To determine if a non-native plant is invasive, look for it on the list under the Invasive Plant Info tab of the Connecticut Invasive Plant Working Group (CIPWG) website: [Home | Connecticut Invasive Plant Working Group](#). Many of the species have information on control methods.

Where to buy native plants:

Earth Tones Native Plant Nursery [Earth Tones Native Plants](#)

Native Plant Trust – shops at Garden in the Woods and Nasami Farm [Native Plant Trust](#)

Northeast Seed Collective: [Eco59/EcotypeProject | Northeast Seed Collective](#) local ecotype seeds and seedlings.
